

ABOUT THIS BOOK

This book is a discussion guide on one aspect of man's communications experience with God. God communicates with man on many levels in many ways here we provide only one and that is through sound.

We all understand from readings in the Old Testament that if God wants to get our attention he can easily do so. Most of man's experience with communicating with God is that when God Speaks man does not listen, man does hear but man does not listen very well at best.
