

ABOUT THIS BOOK

This is a story about a public servant trying to do his job and finding that the cost of obedience can be a hefty price. Detective William Watt, a dedicated public servant finds himself working undercover for a liar and a heartless power hungry FBI agent who is willing to sacrifice his own blood to make a case.

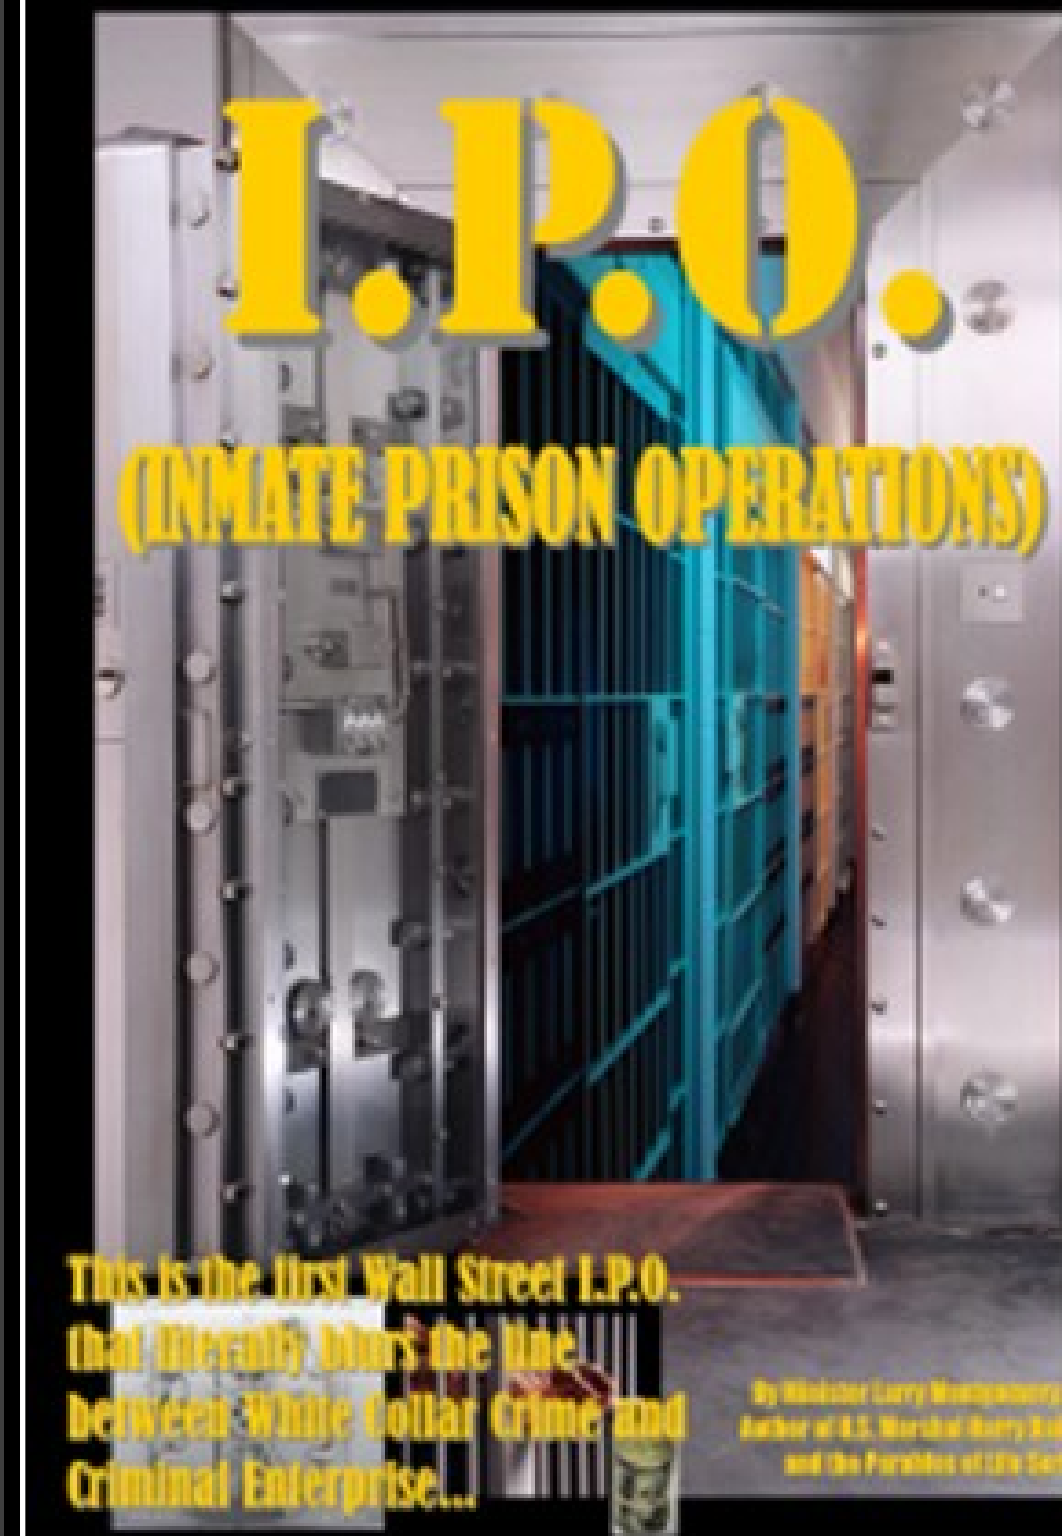

Det. Watt is asked to postpone his wedding and ultimately jeopardize the love of his life, life; to make a case he had no idea would leave so much collateral damage, bloodshed, and psychological turmoil in its wake.

This Story opens inside the state of New York's Lt. Governor's office, who is planning to run for the top job, and is looking to entertain as many high rollers as possible to finance his campaign. Three men meet and discussed building a private prison empire that would house the worse of the worse but prove the candidate's campaign platform was forged in cutting government cost, reducing taxes, and being tough on crime; but they needed a front, a contract and a license to make it happen...

Eventually a mole is planted deep under cover by the name of Det. William Watt. Then three prisoners from different walks of life, a White racist, a Black militant, and an illegal alien looking to make money meet a former stockbroker, jailed for racketeering and drug trafficking, come together under the leadership of an unconvicted serial killer to create the perfect prison for the criminally insane; a place called Prisonland, Inc.

The downfall to this masterful merging of political influence, business expansion and criminal enterprise hinged on one impulsive act, that of a high ranking prison gang lieutenant who rapes the undercover cop's fiancé as a way of getting revenge.

Follow our main character Detective William Watt through this eleven month investigation behind prison walls, in the wake of political kickbacks, law enforcement personnel bribes and murder while he attempts to keep focused on obtaining justice for his violated fiancé during the placement of the I.P.O.
