

ABOUT THIS BOOK

BEYOND THE WAY STATION Part II

The first book in this trilogy was about the moments' right before the souls of six strangers transitioned to either the other side of life, better known as the 'hereafter' or to the next phase of life, known as the second chance to get it right.

Here in the sequel we follow four prospective awardees as they travel the same road to retrieve a large cash reward for doing something good; again not really sure of what. Each of their stories differ from our first group of awardees in that none of this groups awardees will be given the option of being recycled; or even given a second chance at life.

Their lives are over and the only question is where their final resting place will be.
